

2012 SSSSNE SUMMER TOUR – New England Onsite Wastewater Training Center and Rhode Island Soil Field Tour August 22, 2012 from 8 AM to 3:30 PM

Society Members please join us for a hands-on workshop about conventional and advanced wastewater treatment systems located at the New England Onsite Wastewater Training Center (website: <http://www.uri.edu/ce/wq/OWT>) at URI's Peckham Research Farm (Directions: <http://www.uri.edu/ce/wq/OWT/Directions/index.htm>). Fellow SSSSNE members George Loomis and David Kalen will host the event on August 22, 2012 at the Training Center located in Kingston, Rhode Island. You will get a quick refresher about the basics of conventional systems and soil-based wastewater treatment and learn about several advanced treatment technologies and treatment trains commonly used in New England to help protect public health and water quality. You will also learn about wastewater distribution issues; the operation, maintenance, inspection requirements and electrical energy needs of these technologies.

Following lunch, the field tour continues looking at the TA-6 Mesic Spodic hydric soil indicator (http://nesoil.com/ssssne/2011_Turenne_2011_TA-6_Mesic_Spodic.pdf) study site in the Great Swamp along with several other interesting soil pits in the Kingston area.

Please fill out the registration below and mail check to the SSSSNE PO Box, registration is limited to the first 20 people to send in the form below. You will be notified via email of confirmation for the tour.

The workshop begins at 8:00 AM (to beat the summer heat) at the URI Wastewater Training Center and ends at 3:30 PM in the nearby Great Swamp.

Name: _____

Email (required for confirmation): _____

Address: _____

Phone: _____
